

SAVE UP TO 25% ON YOUR MONTHLY ELECTRIC BILLS!

The Power-Save 1200™ : for Residential and Small Business Applications.

The Power-Save 1200™ is a small gray box that fits neatly next to your breaker panel, and saves you money year after year and protects the entire home or business.

The Power-Save 1200™ was designed with the Customer in mind, **providing lower energy bills, increased motor and appliance life; as well as surge and lightning protection**, for all of your electrical equipment!

Residential and Small Business customers throughout North America could see a realized savings of 8% - 10% typically and **as much as 25% on their electrical usage** (and thus power bills). The Power-Save 1200™ is **UL Tested and CSA certified**.

Money isn't all that you are saving when you use the Power-Save 1200. It's an **energy-wise purchasing decision with many positive environmental implications**. Power Suppliers also benefit by being able to supply power to more customers without the generation or acquisition of additional power.

CO₂ emissions from coal burning power plants are reduced too!!

Easy Installation!

The Power-Save 1200™ is simply wired into a dedicated two-pole 20 amp circuit breaker (3 phase units are also available). The unit can be installed outdoors or indoors, at the main breaker panel or on a sub-panel.

Over **10,000 satisfied customers Nation-wide!**
